#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 17 March 2006.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

### DETAILED ACTION

1. This Office Action is responsive to the Amendment filed on March 17, 2006. The Examiner acknowledges the amendment to claim 1 and the cancellation of claim 2. Claim 1 is pending.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Nachaliel et al. (U.S. Patent Number 6,560,480).

In regard to claim 1, Nachaliel et al. disclose a method of impedance imaging of a region within a body. The method employs the use of a multi-element probe to provide an electrical connection to a tissue surface. Nachaliel et al. disclose the method to include steps of applying a sequence of electrical excitation signals having different frequencies to the tissue section and measuring electrical response signals at a plurality of measuring locations on a surface of the tissue section (col. 10, lines 57-67; col. 11, lines 9-22). Nachaliel et al. further disclose method steps including determining electrical admittance data from the response signals gathered by the plurality of sensing elements located on the surface of the tissue section (col. 2, lines 21-67). The Nachaliel et al. method is capable of determining a maximum of the admittance data and

identifying a position on the surface of the tissue section corresponding to the maximum.

Nachaliel et al. reveal method steps comprising determination of a depth position of the lesion using orthogonal leadfields (col. 3, lines 14-35; col. 20, lines 20-53).

### ***Response to Arguments***

4. Applicant argues the Pearlman prior art reference applied in previous office action does not suggest a method for determining the depth of a lesion using orthogonal lead fields. The reference merely suggests that the depth can be determined. Examiner finds this argument persuasive and the rejection in view of Pearlman has been withdrawn. However, a new rejection has been made addressing the limitations of amended claim 1. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3736

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
